## App: Emphasizer

Description: Emphasizer is a photo manipulation app that allows users to highlight certain parts of a photo. Users can choose from spotlight effect, or superimposing pre-made patterns on top of photo. Users can adjust effects/images by pinching/zooming and/or controlling opacity. Users will also be able to purchase more libraries in app. (Main app will be free.)

App requirements:

- Access to user's photo library on phone
- Ability to access user's camera
- Menu of available images and effects
- Ability for users to be able to pinch and zoom to resize effects or images superimposed on their images
- Ability for users to adjust opacity of effects/images
- Ability to access
- Preview ability before saving image
- Ability to store photos saved in Emphasizer
- Ability for users to purchase more libraries
